Digital Business Card:

PROFESSIONAL SUMMARY

Data analyst and cybersecurity student with experience in Python automation, data reconciliation, machine learning, and security research. Proven leadership across technical projects involving malicious DNS detection, system vulnerability analysis, and operational data quality initiatives.

EDUCATION

PURDUE UNIVERSITY | Indianapolis, IN

Expected May 2026

- Bachelor of Science in Cybersecurity | GPA: 3.79
- Dean's List: Fall 2023, Spring 2024, Fall 2024, Spring 2025, Fall 2025

PROJECTS & RESEARCH

Undergraduate Data Science Researcher | The Data Mine

August 2025 – Present

- Collaborating with Elevance Health on Malicious DNS Request detection project
- Utilizing Splunk for pulling and filtering DNS records
- Building Python-based ML pipeline (xgBoost, LSTM) to classify benign vs malicious DNS traffic using historical Splunk datasets

Rolling Code Encryption Security Research

January 2025 – May 2025

- Led an 8-person research team on vulnerabilities in vehicle keyless entry systems, including RF analysis and implementation
- Developed a proof-of-concept RollJam-style replay attack using a Yardstick One and Flipper Zero
- Researched and presented mitigation techniques for RollJam-style attacks

WORK EXPERIENCE

Data Analyst | Foulk Consulting

October 2025 – Present

- Implemented 45% of a year's worth of a major CMDB data reconciliation project backlog in 3 weeks
- Auditing and maintaining CMDB quality by executing large-scale CMDB reconciliation projects
- Designing Python-based solutions for repetitive tasks, increasing efficiency by 60%
- Resolving technical support inquiries to maintain data integrity within the CMDB environment
- Handling user support inquiries through Application Lifecycle Management administration
- Building and deploying Zendesk automations to decrease time to first response by 15%
- Archiving and migrating Application Lifecycle Management projects

Store Manager (Seasonal) | Pyro-Techz Fireworks

2025 – 2026 Seasons

- Managed a team of 4 employees during peak seasonal operations, ensured inventory accuracy, and upheld compliance regulations

Taekwondo Instructor | Fishers Elite Martial Arts

June 2020 – Present

- Designing lesson plans and coaching students age 3 – 55 towards short- and long-term performance goals

TECHNICAL SKILLS

Languages & Systems: Python (Pandas, RFCat), C, SQL, Ducky Script, HTML | Windows, Linux (Ubuntu / Kali)
Security & Research: DNS Analysis, Splunk, Yardstick One, Flipper Zero, Software Defined Radio (SDR), Wireshark
Data & IT Ops: Assyst CMDB, Database Reconciliation, Data Integrity, Machine Learning, Git / GitHub, Automation, Excel
General Skills: Documentation, Professional Communication, Incident Response, Technical Reporting, Public Speaking
